

IN THE SPECIFICATION

Please amend the Abstract at page 22, prenumbered lines 1-15, as follows:

USER INTERFACE, SYSTEM AND COMPUTER PRODUCT FOR MONITORING
AIRCRAFT CABIN SYSTEMS

ABSTRACT OF THE DISCLOSURE

A user interface for monitoring and controlling a plurality of aircraft cabin systems includes a liquid crystal display screen (LCD) having a ~~display touch sensitive input~~ surface configured to ~~provide an input to the user interface when touched by a user of the user interface, and~~ including a plurality of touch sensitive input keys adjacent to the liquid crystal display screen. Each key is labeled with a symbol identifying a respective one of the plurality of aircraft cabin systems. First and second system menus corresponding to first and second systems of the plurality of aircraft cabin systems are displayable on the ~~display screen~~ LCD as first and second system graphical menus when a ~~touch sensitive~~ key identifying the appropriate system is activated by the user. The ~~first and second system~~ graphical menus ~~including~~ include status information and operating functions ~~of the first and systems~~ respectively, as well as ~~at least one~~ an input area configured to ~~provide at least one of that~~ provides selection and control of the operating functions of the respective system when touched by the user.
